Abstract (en)

The wall unit has a metallic outer covering whose inner side is provided with a sound-absorbing material. Holes are provided in the inner side, where the metallic outer covering has an extruded profile (1) made of light metal as a single piece. The extruded profile is closed at four sides relative to the cross section, where the outer covering is made of aluminum or aluminum alloy. A noise protection plate (2) has a distance of 2 centimeters for a wall of the covering, where the plate has openings at bottom side for the discharge of rain water.

Abstract (de)

Das Lärmschutzwandelement besteht aus einem Strangpreßprofil (1) aus Aluminium, das auf der lärmzugewandten Seite (3) Löcher zum Schalldurchtritt aufweist. Im Inneren des Strangpreßprofils (1) befindet sich, mit Abstand zur Metallwandung, eine formstabile Lärmschutzmatte (2), zum Beispiel aus stabilisierter Mineralwolle.
