Abstract (en)
[origin: EP1923512A2] The fountain (10) has a drinking armature (20) coupled with water collecting area (40). A base (30) is assigned to the water collecting area and projects upward over an upper edge of the water collecting area. The drinking armature is arranged in the upper edge area of the base, where the drinking armature is formed for the production of an upward withdrawing water jet. The base is designed in the form of hemisphere, pyramid or cone.
