Abstract (en)  
[origin: EP1923520A1] The invention relates to a wall element (1), comprising at least one carrier profile (2) and at least one plane panel (3) made of an insulating material, wherein the profile (2) has a substantial C-shaped cross section with a base part (4) and two legs (5, 6) connected with the base part (4), wherein one side (7) of the panel (3) is located in a receiving space (8) formed by the C-shaped profile (2). To securely arrange the panel, which does not completely fill out the receiving space, the invention is characterized in that a fixation element (9) is arranged at the base part (4) for clamping the panel (3) between the fixation element (9) and one leg (5, 6).
