Abstract (en)

[origin: EP1923657A1] A remote weapon station comprising a weapon support (3) adapted for rotatable motion about a first transverse axis (X1), the weapon support (3) supporting a weapon attachment device (5) being rotatable about a second elevation axis (X2), the remote weapon station (1) comprises a sight unit (17). The sight unit (17) is rotatable about a third transverse axis (X3) and about, perpendicular to the third transverse axis, a fourth elevation axis (X4), independently of the position or rotation of the weapon support (3) about the first transverse axis (X1) and the second elevation axis (X2), wherein the sight unit (17) is mounted between the weapon support (3) and the weapon attachment device (5).
