Abstract (en)

[origin: EP1923754A1] The movement (20) has a display module (24) with a central bridge (26) that is secured to a support (23), and an annular display ring (28) with an axis (A) that freely rotates about the bridge and contacts the support. The bridge has at least one positioning surface that cooperates with the contact surface (37) of the display ring to position the display ring axially on the support.
