Abstract (en)  
The switch has a contact point at which an electric arc develops during switching operation. An electric arc arcing plates package (10) is formed of several arcing plates (11), where the arcing plates are held together at a distance using retaining elements. The retaining elements are produced from thermoplastic resin, whose after assembly is cross linked by irradiation. A covering is provided with slots at a rear side of the package, where the covering is produced from the thermoplastic resin.

Abstract (de)  
Die Erfindung betrifft elektrische Schalter, insbesondere Leitungsschutzschalter oder Motorschutzschalter, mit wenigstens einer Kontaktstelle, an der bei einer Schalthandlung ein Lichtbogen entsteht. Mit einem aus mehreren Löschblechen (11) gebildeten Lichtbogenlöschblechpaket (10), dessen Löschbleche mittels Halteelementen (26,27,40,41,76,77,104,105,164,165) auf Abstand zusammengehalten sind, sind die Halteelemente aus einem Thermoplast hergestellt, deren Nachmontage strahlenvernetzt ist.
