Abstract (en)

[origin: WO2007025895A1] The invention relates to a floor nozzle for a vacuum cleaner (10) comprising a control device and a brush (22), wherein said brush adopts a first position during a first control position of the control device and a second position during a second control position of the control device. The aim of the invention is to improve the operation of said nozzle. According to the invention, the control device comprises a third control position wherein the brush (22) can automatically adopt the first and the second position.
