Abstract (en)
[origin: DE102005041448A1] The housing (12) of the hammer drill (10) accommodates an electric drive (16) with the appropriate switch (59), a shaft (22) with a pinion (24), a transmission unit (26) with an intermediate shaft (28), a striking unit (36), a drive shaft (46) with a drive wheel (30) and the chucks (50). The switch (59) can be rotated manually and has a handle (100) in the shape of a shell with a transversally positioned linear elevation and an inner part with a central projection engaging with a complementary part. A sealing ring is located between the housing (12) and the shell (100).
