Abstract (en)
[origin: WO2007033113A1] A conveyor for beverage packages includes an endless series of spacer elements by which successive packages (A) are spaced apart from one another. Each spacer element of the series includes a pair of leading and trailing carton engaging lugs (412, 414). The leading and trailing lugs (412, 414) are adjustable from a first setting in which both the leading and trailing lugs of each pair are in abutment with one another to a second setting in which the leading and trailing lugs of each pair are separated from one another.
