Abstract (en)
[origin: WO2007030953A1] The invention relates to a wrist watch (10) with an analogue time display which may be rotated about a central axis and a rotating rim (14) mounted concentrically to the central axis on the housing (11) for setting a time zone different to the local time zone. A simplified setting may be achieved by a stepped adjustment of the rotating rim (14) optionally clockwise or anti-clockwise by means of a button (16) arranged on the housing (11).
