Abstract (en)

[origin: WO2007031366A1] The invention relates to a display system (1) which is used, in particular, in an industrial automation device. The display system has a first display panel (10) which can be electrically operated and is transparent at least in parts and/or at times. The display system (1) also has a second display panel (12), wherein the first display panel (10) is positioned with respect to the second display panel (12) in such a manner that the second display panel (12) can be viewed through the first display panel (10). The second display panel is, in particular, a nameplate.
