Abstract (en)

[origin: EP1925238A1] The fitting (12) has a cabinet body (13) and an accessible interior space (20) on a corner cupboard door (19). A tray (21) is guided in movable manner by a fitting between an inner and outer position, in which the tray partially stands over a level (22) of a door opening of the corner cabinet (11). The lever arrangement (26,28) is formed such that the distance between its bearing position (25,27) and a fixed swivel axis (30) changes the lever arrangement during the tray movement between the inner and outer position.
