Abstract (en)

The nozzle has aspiration ducts (13, 14) arranged in a soleplate of the nozzle and connected to an aspiration tube (22) i.e. flexible hose, by a connection zone (24). The aspiration tube is connected to a vacuum cleaner and is linked to the connection zone delimited by walls (240, 242). A radius of curvature of the walls is greater than 20 millimeters, and an opening (16) is formed in the soleplate of the nozzle. The connection zone is determined by a dome shaped upper part and a lower part that is obtained from the soleplate of the nozzle.

Abstract (fr)

La présente invention concerne un suceur (1) d'aspirateur ouvert vers la surface à nettoyer par au moins un canal d'aspiration (13, 14) ménagé dans la semelle (2) du suceur (1) et s'étendant sensiblement horizontalement, ledit canal (13, 14) étant relié, par une zone de raccordement (24), à un tube d'aspiration (22) relié à l'aspirateur, ladite zone de raccordement (24) étant délimitée par des parois (240, 242), caractérisé en ce que les parois latérales (240, 242) de ladite zone de raccordement (24) présentent un rayon de courbure supérieur à 20 mm, et en ce que le tube (22) lié à la zone de raccordement (24) est un tuyau flexible.
