Abstract (en)

[origin: EP1925376A1] The head has lateral adjustment elements (61, 71) laterally mounted on shafts (20, 30) in connection with vertical posts (41, 51) of a body. Anti-deflection adjustment elements (90, 91) are mounted in a central position of the shafts in connection with a base plate (60) and/or an adjustment beam (80). The beam is installed on the vertical posts parallel to the shafts. The lateral and anti-deflection adjustment elements mounted on bearings are adjusted by vertical adjusting stops (44, 54) of the shafts. An independent claim is also included for a plate forming machine, comprising a sheeting storage coil and a sheet forming head.
