Abstract (en)
[origin: EP1925555A1] A paper roll (2) is rotated around its symmetry axis (3) and packaged by wrapping it with paper tape; the wrapping of the roll (2) being carried out by feeding a first tape (7) in an advancing rectilinear direction (16), by simultaneously translating the tape (7) parallelly to the axis (3) of the roll (2) and by varying the advancing direction of the tape (7) during the aforementioned translation before cutting the tape itself; the packaging being completed by wrapping a second tape at least partially on the first tape and by cutting the same when the wrapping has been completed.
