Abstract (en)  
[origin: EP1925711A1] The cabinet has panels defining sidewalls (2, 3, 4), where one panel is radiative. Vent openings (7, 14) i.e. slots, are provided across a door panel (6). The radiative panel is formed by the sidewalls (2, 3). Radiant heating films (11, 12) are provided at an inner surface of the sidewalls (2, 3). The openings are arranged to form an air stripe along the door panel, different from that of the films. A shield (8) is provided at an inner surface of the door panel for protecting the opening (7).
