Abstract (en)  
The frame (2) has a support leg (4) movably arranged along a guiding device (3) comprising an elongate hollow body (6), whose length is greater than its cross-section. The support leg has a connecting element (7) movable along the hollow body and encompassing the hollow body, which is formed as a conduit and has a round cross-section. The body is open at two ends for fastening of accessories e.g. supporting device such as ironing support, where an inner side of the connecting element has a cross sectional shape same as that of outer side of the hollow body. An independent claim is also included for an ironing board comprising a foldable support frame.
