Abstract (en)

The element has a set of projected blades or teeth (5) on an active surface. The blades or teeth are oriented with each other within a zone area (6) of the active surface in parallel manner. The blades or teeth are fixed on a movable or fixed disc plate (1) of one of a set of active parts of the element. The element is made of a sheet that is issued from rolling equipment and is cut based on the desired shape of the element, where the sheet is made of steel such as stainless steel. A circular crown (3) is coaxial with a part of a spacer (2) and a part of the plate, and is made from the sheet.

Abstract (fr)

Cet élément de raffinage pour fibres, comporte sur sa surface active (4) une pluralité de lames ou dents (5) en saillie, parallèles entre elles au sein d'une même zone (6) de ladite surface active, et destiné à être fixé sur un plateau ou support (1) de l'une des pièces actives dudit raffineur. Cet élément est constitué d'une tôle issue de laminage, découpée en fonction de la forme souhaitée de l'élément.
