Abstract (en)

The wall (1) has grid posts (4) anchored in both sides of the wall, and panels (2) i.e. double bar mat, arranged at a distance from each other and attached to the grid posts. The panels and the grid posts limit a filling chamber for a filling material (32) e.g. gravel. A connection between wires of the grid posts and wires of the panels is directly made by a screw-clamping part (12). A stiffening element is arranged between the grid posts. The posts and/or panel and/or the stiffening element and/or the screw-clamping part are made of metal such as steel or stainless steel.
