Abstract (en)

[origin: EP1925751A1] The unit has two metal sheets (2) forming longitudinal sides and arranged at a distance from one another. One of the sheets forms a base of a wall filling cage of the unit, which is impermeable for a filling material (32). The unit is partially filled with the material in a transport condition or delivery condition. The unit borders the cage with a wall filling space (31) for the filling material. The metal sheets and/or posts and/or metal posts and/or a reinforcement component and/or a screw clamping-fastening unit and/or a metal sheet spacer are made of iron, steel and stainless steel.
