Abstract (en)

[origin: DE202006017885U1] The connector (1) has a housing (2) in which a plugged-in counter plug in connector in the form of a connector or a bush can be secured by a swivel nut (3). A flange plate (8) has a central opening to accommodate and connect the housing with a wall (9). The plate is formed as a single piece and detachably connected with the housing, and a clearance of the central opening corresponds to an external diameter of the nut and/or the housing.
