Abstract (en)
[origin: DE102005045006B3] Case (1) to take clamps (12) has a bottom part (2) with clamp pockets (4) each with side (5) to keep in the clamp piece and a bracket (10) on which to removably hold the clamp, with a shape corresponding to that of the clamp. It has an upper part (3) with several clamp parts to hold the clamp securely in each of the clamp pockets. Each clamp piece has two holders (8) which surround the bracket in each of the clamp pockets and from which each holder possesses a contact part which holds the clamp in question. The bottom part has ridges(14), and the clamp pocket is formed from two ridges. These ridges serve to guide the clip-on instrument to take the clamp out safely.
