Abstract (en)  
[origin: US2009152336A1] A container (2) comprises a bottom part (5) and a lid part (4), wherein the lid part (4) comprises a rectangular lid area (6) connected at three edges (7, 8, 9) with corresponding flanks (10, 11, 12). A fourth edge (3) of the lid area (6) is pivotably connected with the bottom part (5), and the bottom part (5) comprises a rectangular bottom area (17) and four lateral wall areas (22, 23, 24, 25) assigned to a respective edge (18, 19, 20, 21) of the bottom area (17). To improve a container of said type in a manner that said container satisfies all requirements in relation to the transportation and consumption of a corresponding food with means that in terms of construction are as simple as possible, at least one of the lateral wall areas (22, 23, 24, 25) of the bottom part (5) is pivotable about the edge (18, 19, 20, 21) of the bottom area connecting this lateral wall area and the bottom area.
