Abstract (en)
[origin: WO2007031458A1] The invention relates to a ceramic hob (1) for a cooking appliance provided with a controll device (7) for controlling and/or adjusting a real temperature value on at least one part of a cooking plate (2) arranged in a container (4) for cooking by means of an associated heating device (5). The inventive ceramic hob comprises at least one temperature sensor (6) for determining the real temperature value of a heatable part (3) and at least one control element (8, 9, 10) used for setting said temperature to a desired value, wherein a desired temperature value of the heatable part (3) is assigned thereto. According to said invention several desired values can be assigned to one control element (8, 9, 10).
