Abstract (en)
[origin: WO2007033840A1] The aim of the invention is to economically produce name badges having comparably high rigidity. According to the invention, said badge is embodied in the form of single-pieced injection moulding parts, comprising, respectively, one curved front part (1) and one rear part (2) which is also curved and is connected to said front part (1) via pivotable bearings (4). Also, the front part (1) and the rear part (2) are provided with surrounding paths (6, 7) which are oriented in the same direction when the front and rear parts (1, 2) are in the closed state.
