Abstract (en)
[origin: WO2007033691A1] The invention relates to a hand-held power tool comprising a tool housing and an electric motor housed in the tool housing and a battery pack (30) for supplying the electric motor with electrical energy. The battery pack (30) can be detachably locked with the tool housing and comprises a battery housing (28) in which the battery cells (10) are received. The invention is characterized in that damping elements (26) are provided between the battery housing (28) and the battery cells (10) and decouple the battery cells (10) from the battery housing (28) in a vibration-damping manner.
