Abstract (en)

[origin: WO2007033946A1] The invention relates to a busbar system for a double-front electrical switchgear (1). The aim of the invention is to provide a busbar support (3) which is structurally simple and can be universally utilized, especially in double-front systems. For this purpose, the busbar support (3) is arranged between the subconductors (7) of a first subconductor group (4) and the subconductors (8) of a second subconductor group (5).
