Abstract (en)

Ultra-thin hydrophobic layer and oleophobic layer formed by self-assembly on a solid substrate surface of an aromatic compound (I), is claimed. Ultra-thin hydrophobic layer and oleophobic layer formed by self-assembly on a solid substrate surface of an aromatic compound of formula (A-B 1) (I), is claimed. A : dihydroxy substituted aromatic compound of formula (II); Z : C or N +>; X : C-H or C-L; L : electron attractor group comprising F, Cl, Br, I, CF 3 , NO 2 and N(CH 3) 3 +>; either Y 1H or CH3; or XY 15-6 membered heterocyclic atom; T : NH, CO, CONH or NH 2 +>U 1 ->; U 1 ->soluble anion containing F -, Cl -, Br -, I, OH -, NO 3 -, HSO 4 -, SO 4 2-, HCO 3 - or SCN -; and B 11-20C aliphatic linear alkyl group substituted by F. An independent claim is included for a preparation of the ultra-thin layer comprising immersing the substrate in a solution containing (I) in water or its mixture and protic solvent. Abstract (fr)

L'invention concerne une nouvelle couche ultra-mince hydrophobe et oléophobe formée par auto-assemblage sur une surface de substrat solide de composés de formule générale ##### A-B dans laquelle A représente un groupe de formule dans laquelle Z représente C ou N + , X représente C-H ou C-L, L étant un groupe électroattracteur choisi parmi F, Cl, Br, I, CF 3 , NO 2 et N(CH 3) 3 + , Y représente H ou CH 3 , ou Y forme avec X un hétérocycle de 5 ou 6 atomes, T représente NH, CO, CONH ou NH 2 + U - , U - étant un anion soluble, tel que par exemple F -, Cl -, Br -, I, OH -, NO 3 -, HSO 4 -, SO 4 2-, CO 3 2-, HCO 3 - ou SCN -, et B représente un groupe alkyl linéaire aliphatique C 1 -C 20 non substitué ou substitué partiellement ou complètement par F, ainsi qu'un procédé pour préparer cette couche et son utilisation comme épilame.
