Abstract (en)
[origin: EP1927702A1] The unit (200) has a support and guide arm (202) supporting and guiding suction and cleaner hoses. A horizontal portion (210) is movable to a swivel about a vertical axis and in horizontal translation relative to the unit to enable the working ends of the hoses to be positioned above a sewer manhole. A vertical portion (220) is connected to the portion (210). The vertical portion presents a bottom module movable in vertical translation relative to the horizontal portion. The hoses are connected to the module, where a positioning of the module corresponds to a positioning of the working ends.
