Abstract (en)

[origin: EP1927703A2] The insulating material consists of a mixture of EPS beads and EPS powder or splinters derived from cutting or milling EPS boards. The specific weight of the EPS beads or EPS powder is 13 to 18 kilograms per cubic meter. The bead size of each EPS bead is 2 to 6 millimeters. The particle size of the powder or splinter is 0.5 to 4 millimeters.
