Abstract (en)

The invention relates to a target mechanism (1) for shooting, comprising a base unit (2) and a target body (4) which is movable connected to the base unit (2), said base unit (2) is provided with means (6) for moving the target body (4) from a first position (8) to a second position (10). The second position (10) is an optional position based on at least a signal (26) to the said means (6). The invention also relates to a base unit (2) in a target mechanism (1) comprising means (6) for moving a target body (4) from a first position (8) to a second position (10). The base unit (2) comprising a control unit (38) arranged to generate at least a signal (26) to the said means for moving the target body (4) to the second position (10) based on the at least said signal (26).
