Abstract (en)  
[origin: EP1928060A1] The audio device-connector socket comprises a front plate (12) which is connected with a building-lateral installed mounting plate, and an opening (14) in which a connector module (16) is inserted detachable. The connector module has a front side connection part (18) for an audio cable and a rear side connection part for cable of building-side wiring system. An independent claim is also included for a wiring system.
