Abstract (en)

[origin: WO2007027135A1] A protective suit (1) with a trunk part (5) comprising an upper shoulder part (2) with a neck opening (22) and sleeve openings (7,8) arranged on either side of the neck opening (22), a lower trouser part (3) with two leg openings (9,10), a waist part (4) arranged between the shoulder part (2) and the trouser part (3), and sleeves (11,12) attached to the sleeve openings (7,8) and legs (13,14) attached to the leg openings (9,10), and comprising an openable seal (19) arranged in the trunk part (5). The openable seal (19) extends continuously from a point (17,18; 21) on the front (15) of the protective suit (1) located level with one sleeve opening (7), in a line down past the waist part (4) and continuing in over the trouser part (3) and then in a downward arch across the back (16) of the protective suit, back to the front (15) of the trouser part (3), continuing in a line up past the waist part (4) to a point (17,18; 21) situated level with the other sleeve opening (8). The invention has improved fit and an openable seal, which permits the protective suit to be put on and taken off easily and comfortably and also enables the user to relieve himself/herself without removing the suit.
