Abstract (en)  
[origin: FR2891261A1] The dispenser for samples of e.g. perfume comprises a sachet with thin, flexible walls (4, 5) which are fixed together to form a tab (6, 7) at one end. This allows the sachet to be attached to e.g. a magazine. Thicker plates (10, 13) inside the sachet protect a pump (2) and prevent it from being operated accidentally. An independent claim is included for the combination of the dispenser fixed to a flat support, e.g. a magazine.
