Abstract (en)

[origin: WO2007033684A1] A process for heat treatment of poultry eggshells originating from an industrial egg-processing line, in which heat for the heat treatment is generated at least partially by combustion of egg trays. The heat treatment converts at least a part of the calcium carbonate of the eggshells into calcium oxide. The invention also relates to an eggshell product, which may be obtained from said process, and an eggshell heat treatment furnace, which may be used for carrying out said process.
