Abstract (en)

[origin: WO2007030959A1] Rotary press, preferably a web-fed rotary press, comprising a print group with a central cylinder (3) and two impression cylinders (1), each forming a printing gap with the central cylinder (3). The two impression cylinders (1) are arranged diagonally opposite each other across the central cylinder and the two impression cylinders (1) form an impression cylinder pair (4, 4, 5, 5), which can only be engaged and disengaged from the central cylinder (3) simultaneously.
