Abstract (en)

[origin: WO2007030042A1] Method and device for controlling a clutch (3) in a vehicle comprising as long as the displacement of a throttle control (13) remains within a preselected throttle control creep speed range or a brake control (9) remains within a preselected brake control creep speed range, and a first displaced position is selected within one of said ranges, said first displaced position corresponding to a first vehicle creep speed, a control unit (10, 12, 14, 16) maintains said first vehicle creep speed by controlling at least one of brake actuator, engine and clutch actuator as long as the throttle control or the brake control remains substantially in said first displaced position.
