Abstract (en)
[origin: WO2007033713A1] The invention relates to a thread take-off roller for a textile machine which produces crosswound bobbins, for the frictional transport of a thread which is produced in a spinning device. According to the invention, there is provision for the external circumference (7) of the thread take-off roller (10) to be formed by a thin-walled metal ring (11) which is profiled by hydroforming.
