Abstract (en)

[origin: WO2007033925A2] The invention relates to a device for fastening the oscillating unit of a household washing machine (1) comprising a separating bush (2) arranged between the frame (3) of the washing machine and a fixing point of the oscillating unit (42) thereof, first fastening means (5) which are fixable to the oscillating unit fixing point and are located on the end area of the bush and second fastening means (6) which are fixable to the frame and are located on the opposite end area of the bush, wherein the first and second fastening means form a unit which is connected to the separating bush and is used in the form of a spacing element (10) between a washing container and the frame.
