Abstract (en)
[origin: WO2007033935A1] The invention relates to a cooking appliance which is mounted in an elevated manner, which comprises a muffle (5) which defines a cooking chamber and which comprises a muffle opening (6) which is arranged on the base thereof, a base door (7) which is used to close the muffle opening (6) and at least one heating body (22, H1, H4, H5) which is provided in the muffle (5), in addition to an associated operational method. The pyrolysis heating power, which is produced by the base door (7), does not exceed 20 % of the pyrolysis heating power of all heating bodies (22, H1 H5) for pyrolysis.
