Abstract (en)
[origin: WO2007033919A1] The invention relates to a cooking appliance, in particular, a cooking appliance which is mounted in an elevated manner. Said cooking appliance comprises at least one muffle which is defined by a cooking chamber and which comprises a muffle opening, a door which is used to close the muffle opening and a drive motor which is used to displace the door. The drive motor is equipped with a self-locking transmission.
