Abstract (en)

[origin: EP1929986A2] The device has an actuating lever, which is pivoted in a number of positions by a guide device fixed on housing. The large number of switches or switch contacts and an identified number of switches or switch contacts are actuated. An elastic compatible movement transfer device (7) is fixed on the actuating lever (1), which transmits the movement of the actuating lever onto a mechanical actuating device (8) selectively actuating one of the switches (3) or one of the switch contacts.
