Abstract (en)
[origin: DE102006057705B3] The heating system has an electrostatic separator (1) in exhaust gas line and a flow channel (2) with a channel wall (2a) and an inner side of channel (2b). The electrode feed (4) is coated with an insulator (5). A particle rejecting unit (6) is enclosed, which prevents the deposition of particles of waste gas in the insulator.
