Abstract (en)
A jet lance for delivery of fluids and/or decontamination/detoxification products. The lance comprises at least one first conduit (6) having an inlet (4) for fluid communication with an external working fluid supply line and an outlet (5) provided with a first jet nozzle (14). Such conduit (6) has means for supplying a decontamination/detoxification product (16) which is susceptible of being mixed with the working fluid upstream from the first jet nozzle (14). The lance further comprises temperature-sensing means (24) for sensing temperature in the first conduit (6) having a display (25) visible from the outside. Also disclosed a process for making such lance.
