Abstract (en)

[origin: EP1930243A1] A contact lens package (10) includes a base member (12) including a cavity (16) dimensioned to accommodate contact lens and a liquid therein. The combination of the cavity, the contact lens, and the liquid cooperate to collimate partially collimated light (112) directed toward a bottom surface of the cavity. The cavity can be sealed by attaching a removable sealing member (14) to the base member around the cavity. A method of inspecting ophthalmic lenses using the present packages is also described.
