Abstract (en)

[origin: EP1930527A2] The device has a mounting plate (3) with an angled foot flange (4) and two protruding holding legs (6,7) that engage grooves (8) in the board (1) and form edge elements (9) that are curved back against the legs. The holding legs consist on the one hand of long edge sections of the mounting plate bent out of the plane of the plate and on the other hand of long edge sections of the foot flange bent out of the plane of the flange.
