Abstract (en)

[origin: WO2007042718A1] The invention relates to a method for producing a sheet material (22), comprising at least one paper layer, by using a paper-making process consisting in spraying at least one jet of pressurised fluid (29), in particular a water jet, on a still wet layer in such a way that at least one window (25) is formed therein by material-removing processing.
