Abstract (en)
[origin: WO2006128440A2] The invention relates to a door (10), in particular a door for a motor vehicle. The door (10) is provided with a door brake (18) which comprises a brake rod (20) having a brake device which works thereon. According to the invention, the brake device is hydraulic. The brake device can be controlled by means of an electrically switchable valve in order to minimise the actuating force for the brake device.
