Abstract (en)
[origin: WO2007033927A1] The invention relates to a cooking appliance, in particular, a cooking appliance which is mounted in an elevated manner, which comprises at least one muffle which defines a cooking chamber and which comprises a muffle opening, a door which is used to close the muffle opening and a drive device which is controlled by a control device and which is used to displace the door. Said drive device comprises at least one drive motor which can be moved by the cables which are connected to the door. The cables, which are lay cables, can be displaced by the drive motor in a linear manner.
