Abstract (en)

[origin: WO2007031629A2] The invention concerns an ultrafine double-sided illuminated sign (1) comprising a light module (2; 2') or an assembly of light modules (2, 2'), each light module including a support plate (20), and on each of the two sides of said support plate, called mounting surfaces, an assembly of surface-mounted LEDs which are arranged so as to form at least one illuminated pattern and which are surface-welded to the corresponding mounting surface of the support plate.
